Photo Sheet and more

The big picture in professional photo printing.

Epson unwraps its new package for stunning and professional large-size photographic output: the EPSON Stylus Photo EX ink jet printer.

With fast photo print speeds, the EPSON Stylus Photo EX gives serious photographers an invaluable tool for brilliantly showcasing their best efforts in vivid, bigger-than-ever prints, up to a whopping 11.7" x 44"! What's more, even sharp-eyed pros will find it tough to distinguish between a printout and an original photo.

That's because Epson's enhanced Super MicroDot™ technology and high resolution Micro Piezo™ print head are on the job, delivering 1440 x 720 dots per inch of awe inspiring, 6-color Photo Reproduction Quality (PRQ™) for each and every photo printed, whether your pictures are snapshots or ambitious panoramas.

For a nice touch of convenience, the new EPSON Stylus Photo EX also gives users easy and direct camera-to-printer printing when teamed with the Epson PhotoPC® 600 digital camera.

Photographers seeking professional options won't be disappointed here, either. The EPSON Stylus Photo EX offers choice options like Adobe Postscript Level 2 and Pantone CALIBRATED Approved color matching. It's also fully compatible with both Windows and Macintosh.

All of that plus the Epson Digital PhotoLab™ EX software suite makes the EPSON Stylus Photo EX perfect for editing, compositing, resizing, cataloging and printing the most strikingly distinctive photo images you've ever seen.

The EPSON Stylus Photo EX. It's the printer to choose for the big picture and then some.
